## PLOT OF THE OPERETTA.

IT is Midsummer Eve and the villagers of Barossa are holding annual festival. Sanchica, the barber's daughter, has found a strange looking key. Kadiga, a gipsy woman, declares it to be a magic key and relates a legend concerning a princess shut up under a spell, in a cave beneath the mountains. This legend is discredited by all except Sanchica, who determines to slip away in the night, find the cave and free the princess. She is aided by the fairies, who of course can only be seen by those who believe in them. Among the mountains she falls in with the Gnomes and Nymphs, who recognise her key as the "Key of the Human Heart," for the loss of which they had long been banished from Fairyland. This Magic Key is restored to Titania, Queen of Fairyland, who by means of it can now regain possession of the hearts of mortals.
