

Building a Better Tower Gateway

Longer and bigger platforms, more trains, easier entry and exit are all part of the plan for meeting your travel needs.

By Summer 1990 most work will be completed, and the commissioning of the first of the new trains will ensure that a train is always waiting at the platform during peak hours.

More trains will be progressively delivered in 1990 and we shall also be introducing trains with 2 cars.

All of which will improve capacity substantially and give you a much higher level of comfort.

2 car trains
(spring 1990).

New Exit
staircase from
concourse
(spring 1990).

Larger concourse
(Jan 1990).

Additional train
in platform at peak
hours (Feb 1990)

Longer platforms for
2 car trains (part open now –
completion end 1989).

New exit from platform
(spring 1990) to Mansell Street

Bank Extension
(under construction).
